AT A GLANCE

Software Engineer || M.S. Computer Science || Java, Spring Boot, REST APIs || Seeking Backend or Full-Stack Software Engineering Opportunities

LINKS

Portfolio, LinkedIn

PROFESSIONAL SUMMARY

Early-career software engineer skilled in Java and Spring Boot, focusing on developing robust applications and optimizing data workflows. Proven ability to enhance operational efficiency through automated data validation and streamlined reporting processes. Experienced in Agile methodologies and collaborative development practices. Committed to continuous learning and leveraging diverse technologies, including SQL databases and cloud solutions.

TECHNICAL PROFICIENCIES

Java Fundamentals:	OOP, Collections, Exception Handling, Generics, Streams
REST API:	HTTP Methods, Status Codes, JSON, Request/Response Handling, Endpoint Design
Data Integration:	SQL, PostgreSQL, JDBC, Spring Data JPA, Hibernate
Testing:	JUnit, Mockito, Unit Testing, Test Driven Development
Tools:	Docker, Jenkins, AWS, GCP, Git, Maven, Postman
Spring Framework:	Annotations, Dependency Injection, Application Properties

EMPLOYMENT HISTORY

Jul 2022 — Sept 2023

Software Developer Apprentice, Cognizant

- Developed Java and Spring Boot services to support data-processing workflows for a retail e-commerce client.
- Designed automated data validation services to improve consistency between GCP Spanner and BigQuery.
- Streamlined report generation and stakeholder notifications, reducing manual reporting.
- Maintained RESTful API functionality using Java, Spring Boot, and SQL querying.
- Collaborated with other developers in Agile ceremonies, leveraging Git for development and code review.
- Contributed to front-end development using Angular and TypeScript to support web application functionality

Present

Production Team Lead, Motis Brands - Mac’s Custom Tie-Downs

- Developed step-by-step build guides to improve training efficiency.
- Enhanced accessibility for non-English-speaking team members with comprehensive documentation.
- Maintained close attention to detail during cross-departmental handoffs.
- Supported bottleneck areas to optimize workflow.
- Conducted quality inspections to ensure products met brand standards and customer specifications, improving on-time order fulfillment.

EDUCATION

Jun 2026 — Master of Science in Computer Science, DePaul University — Chicago

Jul 2018 — Bachelor’s in Interdisciplinary Studies, Florida International University — Miami
